

DELPRO Wind is a leading supplier of services for the installation and commissioning of medium and high voltage electrical equipment at offshore and onshore wind farms.

As an integrated part of the Fred. Olsen related companies, DELPRO Wind works directly with customers to provide medium and high voltage electrical services, or with other Fred. Olsen related companies as part of a larger installation or service solution.

DELPRO Wind was founded in 2014 as a joint venture between DELPRO A/S (founded in 2000) and Global Wind Service A/S. We have approximately 120 employees, working on projects around the world.

HV/MV ELECTRICIANS for UK

We are looking for skilled HV/MV ELECTRICIANS

For installation and maintenance of high voltage switchgear etc. primarily at OSS / wind turbines we are looking for electricians or equivalent with technical flair to become part of our company's success story.

Key responsibilities:

- ◆ Installation and inspection of MV (10-35kV) switchgear
- ◆ Installation of transformers and tests signals to/from switchgear, transformers, smoke detectors, oil levels etc.
- ◆ Installation of HV cable joints and terminations up to 245kV (i.e. T-connectors, shrink and slip-over terminations)
- ◆ Installation, commissioning and maintenance of HV switchgear and transformers on OSS and HV substation equipment up to 400kV.

Person specification:

- ◆ Education in electrical engineering (minimum 4 years) is a requirement
- ◆ You have at least 5 years of experience in the wind industry preferable including offshore works
- ◆ Experience with High Voltage cables (preferable)
- ◆ Experience with live switching / switching schedules is a considerable advantage
- ◆ Experience / training with High Voltage cables (preferable);
- ◆ Full GWO
- ◆ Ready and willing to work abroad on onshore and offshore projects
- ◆ You are careful and responsible with your work, flexible, can work independently and in high spirits
